Signing on/off the FHA Connection

This FHA Connection Guide module provides training on FHA Connection sign-on/sign-off related topics:

- **Sign on Requirements and Procedures**
- **Password & User ID Guidelines and Problem Solving**, including:
  - Password Rules
  - Password Change
  - Password Reset
  - Account Lockout
  - Retrieving a Forgotten User ID
  - User ID Termination/Reinstatement

- **Signing off of the FHA Connection**

**Sign on Requirements and Procedures**

To sign on to the FHA Connection, you must first register and be authorized to use the system (see the FHA Connection Guide module: FHA Connection Registration Procedures). Upon successful registration and authorization setup, you receive your FHA Connection user ID from your Application Coordinator. Usage rules include:

- This user ID is a unique identifier assigned specifically to an individual within an organization. **Sharing the user ID is prohibited.**
- As an authorized user, you are accessing a secure HUD system with requirements and penalties regarding information access, alteration, damage, or destruction, as is noted on the registration form that you complete and on the Warning posted on the FHA Connection Welcome page (Figure 1).
- To sign on, enter the user ID assigned to you and the password you chose during registration for your access to the FHA Connection (Figure 2).

Figure 1: FHA Connection description as a secure system and federal information warning
As recommended on the FHA Connection registration form, it is important to remember the password you recorded on that form as it is not provided back to you when HUD issues your user ID. In the event of a password problem, use the Forgot Your Password? link to access the Password Reset page (see Password Reset in this module).

If you continue to have a problem:
- contact your institutional Application Coordinator, or
- the FHA Resource Center or the FHA Connection Single Family Administrator whose contact information is available via the Contact Us links on the Welcome page (Figure 2).

First-time users of the FHA Connection must sign on and then change their password immediately (a security procedure as the initial password is recorded on the registration form). This password should be known only by you and should never be shared, displayed online, or divulged publicly in any way. This includes, but is not limited to, examples such as provision to third parties in telephone conversations, placing on office message boards, and/or recording in a written note, message, or workstation file.

**Sign on Steps**

Use the following steps to sign on to the FHA Connection:

1. Enter your HUD-assigned user ID and password on the FHA Connection Welcome page (Figure 2).

   **Figure 2:** Welcome page for signing on to the FHA Connection (upper part of page displayed)

2. Click Sign on. The Main Menu appears for you to select a business area in which to work (Figure 3).

3. Click Single Family FHA, Multifamily FHA, or Lender Functions to reach those menus, or use other Main Menu options, i.e., page header and footer links, or FHA Connection Resources (Figure 3).
4. For detailed, illustrated training for using the FHA Connection’s menus and functions, refer to other FHA Connection Guide modules, including Using the FHA Connection, and modules located in the Single Family Origination, Single Family Servicing, and Neighborhood Watch sections of the FHA Connection Guide website.

Password & User ID Guidelines and Problem Solving

Specific guidelines apply in the processes of password creation and entry, password change, and password problem solving and reset. The following subsections cover key password topics:

- **Password Rules**
- **Password Change**
- **Password Reset**
- **Account Lockout**
- **Retrieving a Forgotten User ID**
- **User ID Termination/Reinstatement**

**Password Rules**

- Passwords MUST NOT be disclosed
  - At initial sign on, new users are prompted to change their password immediately. This security procedure is due to the registration password being recorded on the registration form.
  - From this point on, your password should be known only by you and should never be shared, displayed online, or divulged publicly in any way.
Password creation rules include the following:

- MUST be changed every 90 days
- MUST be eight (8) characters in length
- MUST contain at least one:
  - number,
  - uppercase letter, and
  - one special character, e.g., @, #
- ARE case sensitive, e.g., if M@ry1#Ab is your password, entering m@ry1#aB will fail
- MUST include numbers, letters, and a special character
- Cannot be changed to any of the last eight passwords used

Note: Click on the Password Change page (Figure 5) for assistance.

**Password Change**

Password change is required every 90 days. If it is not changed within the 90-day time frame, the Password Change page appears automatically when you next attempt to sign on. The following steps show how to change your password (at any time, as needed or required):

1. Sign on to the FHA Connection and select ID Maintenance (Figure 3); from the ID Maintenance page, select Password Change (Figure 4).

2. On the Password Change page (Figure 5), enter and re-enter the new password. When the page reappears with a Success message, navigate to the desired menu to begin processing.
Password Reset

If you forget your password, you can reset it using the FHA Connection’s Password Reset page accessed using the Forgot Your Password? link on the Welcome page (Figure 6).
Enter your User ID, Last Name, and Mother’s Maiden Name. Upon verification of the entered information, the password is reset to the last six digits of your Social Security Number. If you are unable to reset your password, contact your Application Coordinator, the FHA Resource Center, or the FHA Connection Single Family Administrator for password reset or to receive sign on assistance. Use the Contact Us links on the Welcome page (Figure 2) to find FHA Resource Center or Single Family Administrator contact information.

After a password reset, sign on using the last six (6) digits of your Social Security Number (SSN). The page for the Password Change function (Figure 5) automatically appears, requiring you to create a new password. This is a security measure.

**Account Lockout**

If you enter an incorrect password on three consecutive sign on attempts to the FHA Connection, your user ID/account will be locked (you will be unable to sign on) and the FHA Connection Password Reset page is displayed. Your user ID will remain locked until you reset your password (see the Password Reset section).

**Retrieving a Forgotten User ID**

If you have forgotten your HUD-assigned user ID, click the Forgot Your User ID? link on the FHA Connection Welcome page (Figure 7) to begin the process of retrieving your ID. Complete and submit the displayed page (Figure 7) and follow the instructions provided which are based upon your User ID and the entered information.
User ID Termination/Reinstatement

If you have not signed on to the FHA Connection for 90 days, your user ID is terminated. If there are no authorization problems, you can be reinstated by your Application Coordinator.

As part of the reinstatement process, your password is reset to the last six (6) digits of your Social Security Number (SSN). After reinstatement, sign on by entering your user ID in the User name field and entering the last six (6) digits of your Social Security Number (SSN) in the Password field. The page for the Password Change function (Figure 5) automatically appears, requiring you to create a new password. This is a security measure.

Signing off of the FHA Connection

After completing your work on the FHA Connection, or if you need to be away from your computer, you should end your current session by signing off of the FHA Connection. This security measure will help prevent unauthorized users from accessing sensitive information using your assigned User ID.

To sign off of the FHA Connection, click Sign Off, which is located in the page header (Figure 3). You are returned to the Welcome page of the FHA Connection (Figure 1).

In addition, you are automatically signed off if you do not actively use the FHA Connection for a period of 20 minutes. When this automatic sign off occurs, the last page that you accessed remains displayed (with any previously entered information). However, when you attempt to process the current page or go to a new page, the FHA Connection Welcome page appears and requires that you sign on again. After successfully signing back on, the system responds to your last action (e.g., it processes the page with all previously entered information if you had clicked Send or displays the page you were attempting to access). However, if your sign on attempt is not successful or if you close the browser and then sign on to the FHA Connection, any previously entered information that was not processed must be reentered.
