Case Processing Overview

This FHA Connection Guide module describes the case processing cycle, beginning with the Case Processing menu (Figure 1), and provides guidance on using the FHA Connection's:

- main case processing functions, including Case Number Assignment, Appraisal Logging, Insurance Application and HECM Insurance Application (see Key Case Processing Functions)
- case processing support functions, listed in Figure 1 and discussed in Case Processing Support Functions
- other functions used in case processing that support Single Family Origination business processes (Figure 2) (see FHA Approval Lists Functions that Support Case Processing)

Figure 1: Case Processing menu
Key Case Processing Functions

The Case Processing menu is reached by following this path: Single Family FHA > Single Family Origination > Case Processing. As shown in Figure 1 above, the Case Processing menu includes all functions necessary to process an FHA case from the initial assignment of an FHA case number through the application for FHA insurance and endorsement. When a borrower is an applicant for an HUD-insured mortgage:

- the lender gathers the information required for Case Number Assignment to establish the case in HUD’s loan origination system and be assigned an FHA case number.

- once the FHA case number is assigned, the lender or sponsor/agent uses the case number to access and add or update information as the case progresses towards endorsement for FHA mortgage insurance.

Table 1: Key Case Processing Functions describes each of the functions required to bring an FHA case to endorsement and provides training resources for each one.

Table 1: Key Case Processing Functions

- **Case Number Assignment**: Use Validate Borrower/Address for Case Number Assignment to validate the borrower and address information associated with a new case. Use Case Number Assignment to enter case-related information (categories are: General Information, As Required, Property Address, Compliance Inspection Fields, Borrower Information, and Lender Notes).

- **Update Existing Case**: Use Update Existing Case to correct or add information on a case with an assigned case number prior to endorsement of the case. Note: Borrower/Address Change is used to correct borrower and property address information.

- **Holds Tracking**: Use Holds Tracking to monitor cases held during Case Number Assignment to determine hold reasons and borrower validation status. Also use Holds Tracking to determine if subsequent changes to borrower information, e.g., using Borrower/Address Change, passed or failed overnight borrower validation.

| **Appraisal Logging**     | Use **Appraisal Logging** to log, add, change, or review appraisal information in HUD’s origination system for non-endorsed cases prior to insurance processing. Required for regular direct endorsement cases, but not for most irregular cases, except for DE HECM and 203(k) HUD Real Estate Owned (REO) cases. If the case requires an appraisal, **Appraisal Logging** must be processed before submitting the insurance application. After a case is endorsed for insurance, appraisal information is view-only. | 1. *FHA Connection Guide: Appraisal Logging*  
2. On the **Case Processing** menu page (Figure 1):  
   - *WINK: Appraisal Logging*  
   - *Processing a Mortgage* tutorial |
| **Insurance Application** | Use **Insurance Application** to add, review, or change insurance application information for a case prior to endorsement. For the Lender Insurance (LI) program participants, **Insurance Application** is also used to endorse a case (excluding HECM cases). | 1. *FHA Connection Guide: Endorsing a Single Family FHA Case*  
2. On the **Case Processing** menu page (Figure 1):  
   - *WINK: Insurance Application*  
   - *Processing a Mortgage* tutorial |
| **HECM Financial Assessment** | Use **HECM Financial Assessment** to add, change, or review the financial assessment information recorded for HECM cases established on or after April 27, 2015. The financial assessment is required to evaluate the ability of the borrowers to meet their financial obligation and must be completed before HECM Insurance Application can be processed. | 1. ### Case Processing Support Functions

The **Case Processing** menu includes **case processing support functions** for the input, updating, and retrieval of case information during the FHA case processing cycle. **Figure 1** lists the case processing support functions. For guidance on these support functions, refer to:

- **FHA Connection Guide’s Case Processing Support Functions** module at:  
- **Quick Start: Single Family Origination Case Processing** at:  
FHA Approval Lists Functions that Support Case Processing

The FHA Approval Lists menu is reached by following this path: Single Family FHA > Single Family Origination > FHA Approval Lists (Figure 2). The functions accessed from the FHA Approval Lists menu provide:

- the ability to query HUD’s official information lists for Single Family origination (e.g., Appraisers)
- access to databases outside of HUD, e.g., the GSA Lists link to the General Services Administration’s System for Award Management (SAM) (consolidated Federal system of information designed for the purpose of government-wide acquisition and award support; includes parties excluded from receiving federal contracts, certain subcontracts, or certain types of federal financial and nonfinancial assistance and benefits).

Some of these functions are used as a lookup within other FHA Connection functions, such as Case Number Assignment. This lets you use FHA Approval Lists without exiting the page you are on. On the function page with which you are currently working (e.g., Case Number Assignment), a lookup icon is displayed next to a field for which the lookup can be used. Click the lookup icon to search for the appropriate information and enter it in the field. See the FHA Connection Guide module: Using the FHA Connection for additional information on available user aids.

Training on the FHA Approval Lists functions is available as follows:

- WINK modules located adjacent to the listed function: 203k Consultants, Appraisers, HECM Counselors, Inspectors, Nonprofits, and Underwriters (Figure 2)
